Dear Xi Wang

Jing Qian would like to invite you to review a paper for the CHI 2026 Papers Track:

#7850 - Droplets: Smartphone-Based Single-Drop Liquid Testing Beyond the Laboratory

To read the paper's abstract, learn about the review process, and/or learn more about the CHI conference and CHI 2026, see the bottom of this email.

To see the paper, you can log on at

https://urldefense.proofpoint.com/v2/url?u=https-3A__new.precisionconference.com_sigchi&d=DwlFaQ&c=slrrB7dE8n7gBJbeO0g-IQ&r=kass0JWVleolriXnzcWXMg&m=6N7RNeERkVTRoXLdfjxBzACDKLqKVGorLFPdCgelqW-pAujxcON06PGrp64akkK3&s=6VIUpXUAu4oQ3WbNQDjQ3iAe9eSF699TrRoDFi83LoQ&e=

Please click one of the two links below to accept or decline this request.

IMPORTANT: If you are not knowledgeable about the area of the submission, before you accept the invitation, contact Jing Qian. Tell them about the expertise mismatch and confirm that they still believe you to be a good fit.

When volunteering for review, please keep in mind that integrity of peer review is the bedrock of academic practice, and it is important you complete all the duties associated with the role in a professional manner. Please refer to the ACM Peer Review Policy for specifics.

https://urldefense.proofpoint.com/v2/url?u=https-3A__www.acm.org_publications_policies_peer-2Dreview&d=DwlFaQ&c=slrrB7dE8n7gBJbeO0g-IQ&r=kass0JWVleolriXnzcWXMg&m=6N7RNeERkVTRoXLdfjxBzACDKLqKVGorLFPdCgelqW-pAujxcON06PGrp64akkK3&s=XUBzSDfM7Jq0aEDq4U4Kf_M0CSBFWulI68c96C7RUdc&e=

The content below contains important information about changes from previous years, so please read the following message carefully before you decide whether to accept this review invitation even if you are an experienced CHI reviewer. See the timeline below for important dates as well.

To accept: https://urldefense.proofpoint.com/v2/url?u=https-3A__new.precisionconference.com_chi26c_accept-5Freview_MjQxMjg.mh-5FUUYu8o8xKryNjEZVtk5ECD8o&d=DwlFaQ&c=slrrB7dE8n7gBJbeO0g-IQ&r=kass0JWVleolriXnzcWXMg&m=6N7RNeERkVTRoXLdfjxBzACDKLqKVGorLFPdCgelqW-pAujxcON06PGrp64akkK3&s=0rA02Vr5cpKtNcT-sKY89GA-WpupQJXUyBwGm-A01nk&e=

To decline: https://urldefense.proofpoint.com/v2/url?u=https-3A__new.precisionconference.com_chi26c_decline-5Freview_MjQxMjg.mh-5FUUYu8o8xKryNjEZVtk5ECD8o&d=DwlFaQ&c=slrrB7dE8n7gBJbeO0g-IQ&r=kass0JWVleolriXnzcWXMg&m=6N7RNeERkVTRoXLdfjxBzACDKLqKVGorLFPdCgelqW-pAujxcON06PGrp64akkK3&s=tHq4gVyaTN5ryRj0aWtbkwbm_W0WzjIJUTsY2RQBWYaY&e=

Revise and Resubmit

CHI 2026 follows the revise and resubmit timelines to give reviewers more time to review papers. For more details about the review process, please refer to the following page on the CHI 2026 website:

https://urldefense.proofpoint.com/v2/url?u=https-3A__chi2026.acm.org_papers-2Dreview-2Dprocess_&d=DwlFaQ&c=slrrB7dE8n7gBJbeO0g-IQ&r=kass0JWVleolriXnzcWXMg&m=6N7RNeERkVTRoXLdfjxBzACDKLqKVGoRLFpdCgelqW-pAujxcON06PGrp64akkK3&s=SjJnOoUV-B7YM3DU7z7LDPf0sKodjnSrZU9yxl-7XPo&e=

IMPORTANT: If you recommend Revise and Resubmit for a paper, this means that you believe that the authors can rectify the paper in a 5 week period, and then, if an AC agrees, you will be required to re-review it in Dec/Jan. Revise and resubmit for CHI is implemented on a limited time frame. In particular, this means that reviewers are not expected to provide a second full review but should read the response and evaluate the highlighted changes to the PDF provided by the authors.

Paper Length

There is no explicit paper-length limit on submissions, however papers should be considerate of length commensurate with their contributions. CHI 2026 has asked authors to self-classify their papers as short (<5,000 words), standard (5,000-12,000 words, on average 7,000-8,000 words), or excessively long (over 12,000 words). This means that a short paper should have a solid but concise contribution. Excessively long papers need to have that something extra to make the contribution commensurate with length.

Reviewers should recommend reject for papers whose lengths are incommensurate with their contributions (i.e., a very long paper with only a small novel contribution).

Important dates

All times are in the Anywhere on Earth (AoE) time zone.

For the first submission:

- Reviews due from reviewers: October 23, 2025
- Discussion phase for reviewers until: October 29, 2025
- Reviews released to authors: November 4, 2025

For revise and resubmission:

- Resubmission due from authors: December 4, 2025
- Re-reviews from reviewers before: January 5, 2026
- Re-discussion from reviewers until: January 11, 2026
- Decisions released to authors: January 15, 2026

Review policy

Please consider the Guide to Reviewing Papers (https://urldefense.proofpoint.com/v2/url?u=https-3A__chi2026.acm.org_guide-2Dto-2Dreviewing-2Dpapers_&d=DwlFaQ&c=slrrB7dE8n7gBJbeO0g-IQ&r=kass0JWVleolriXnzcWXMg&m=6N7RNeERkVTRoXLdfjxBzACDKLqKVGoRLFpdCgelqW-pAujxcON06PGrp64akkK3&s=135FtaUMDbFP9QH23JOJ431z4BH0urk0ue013Gsq3Kg&e=) and the Code of Conduct in Reviewing (https://urldefense.proofpoint.com/v2/url?u=https-3A__chi2026.acm.org_code-2Dof-2Dconduct-2Din-2Dreviewing_&d=DwlFaQ&c=slrrB7dE8n7gBJbeO0g-IQ&r=kass0JWVleolriXnzcWXMg&m=6N7RNeERkVTRoXLdfjxBzACDKLqKVGoRLFpdCgelqW-pAujxcON06PGrp64akkK3&s=QfW-Z8g-fui941c2SwZtqWugyQxQigQq56if_5XGqTE&e=) as you work on reviews.

To maintain the integrity of the review process, reviewers should avoid sharing content from unpublished papers with any online tools that may store or process the data in ways that could compromise confidentiality, including systems

based on Large Language Models such as Chat GPT. As a reviewer, it is your responsibility to understand the implications of the use of any such tool and abide accordingly.

Reviewers are personally responsible for any and all text they submit as part of their review. As such, you should ensure your reviews are accurate and representative of your assessment of the reviewed manuscript.

All papers are considered confidential and you should not publicly discuss the content of the paper.

Even if you have reviewed the previous version of this submission at previous CHI or other venues, please review it as if it is a new submission. There is an optional field in the submission form that authors may use to describe revisions from any previously submitted papers. Please check this field before finalizing your review.

Accessibility

CHI strives to be an accessible conference from all parts of the process, including the reviewing stage. If you require accessibility support for reviewing a paper, please do not hesitate to notify the 1AC. For example, if you find a PDF without alt text for images included. The 1AC will work with the accessibility chairs to provide you with a paper in an accessible form.

Thank you for considering this task!

Jing Qian

Abstract

We present Droplets, the first smartphone-based liquid testing solution based on the image of a single liquid drop. The key innovation of Droplets lies in its capacity to discern liquids by leveraging their contact angle and capillary length, even from imperfect images – making it accessible to untrained individuals in non-laboratory settings. Building upon the Young-Laplace equation, we introduce a methodology for fitting the theoretical model of an imperfect drop profile measured from the image of the drop captured by the smartphone camera. To address the challenges posed by the non-laboratory setting, Droplets is designed to assist users in capturing high-quality images of the drop. Results from an Android implementation of Droplets demonstrate its ability to classify liquids with an accuracy of 84%. What is more, the experiments show that Droplets can be utilized to detect counterfeit liquors and track protein levels in urine, opening up numerous practical applications.

ACM CHI is the top conference for Human-Computer Interaction.

For those who are finding out about CHI – pronounced "kai" – for the first time, CHI is a place to see, discuss and learn about the future of how people interact with technology. At any minute you might experience a new gesture interface for tablets, learn how developing countries use mobile phones for maternal health, play soccer against someone 3000 miles away, or debate the future of online education. You'll meet with top researchers from universities, corporations and startups from across the world, as well as the brightest student scientists, designers, and researchers. It's a place to find your community, to talk about your toughest problems, and to find your next job.
